

Human Phenotype

Description

The [Human Phenotype](#) ontology [1] contains data about human genotype - phenotype associations initially developed using information from Online Mendelian Inheritance in Man (OMIM) and now incorporating additional data from the medical literature.

Statistics

Statistics can now be found in the footers of each table in the GREAT web output.

Download

All ontology data was downloaded and built between Oct 14, 2011 and Feb 18, 2012.

GREAT v1.8

GREAT v1.8 Human Phenotype statistics are [available here](#).
